

The operations of Curtiss-Wright Ytstruktur Arboga AB shall be performed under safe and stimulating conditions. Our goal is to minimize the risks for unsafe situations at work and the organizations impact on the environment, including all Curtiss-Wright activities, products and services.

We shall comply with all applicable laws, regulations and organizational standard in the environmental and health context. Our ambition is also to go further, by aiming for a reduced environmental impact, including a commitment to continual improvement and the prevention of pollution. By health we mean physical and psychosocial aspects.

In the daily operations every employee shall take a personal responsibility for health & safety and the environment. Everyone has to follow the implemented, maintained and communicated procedures for health and the environment and immediately report every deviation to the management.

Our goal is achieved by

- Any disruption, incident or accident are reported and managed in the management team and in staff meetings.
- Education and motivation of employees to perform the operations in an environmental and safe optimal way.
- By an open dialogue and with training and information.
- Environmental impact and risks of safety of new investments are to be considered and discussed with the employees.
- Checking the efficiency and function of the EMS and EHS by systematic environmental and safety audits of the operations and by follow up on environmental and safety objectives and targets.
